Scientific Laboratory Supplies Agree Exclusive Distribution Deal to Supply Taylor Wharton Cryogenic Systems

Scientific Lab Supplies (SLS) is pleased to announce that it has agreed an exclusive distribution deal with UK based LABMODE for the complete range of Taylor Wharton cryogenic storage systems.

Taylor-Wharton Cryogenics is the leading manufacturer, with over 40 years of experience in the design and production of cryogenic storage vessels for liquefied gases used in medical, scientific, biobanking and industrial applications. LABMODE are Taylor Wharton's distribution partner in the UK and have a wealth of knowledge and expertise within this area. SLS are the UK's largest independent supplier of laboratory equipment, chemicals and consumables with the ability to offer customers a complete solution to their cryogenic requirements.

Mark Fagan, Director, LABMODE announced "We are delighted to have agreed a partnership with SLS for the sales and service of Taylor Wharton Cryogenic equipment. SLS and LABMODE have a reputation in the marketplace for looking after our customers' needs and together we can fully support their cryogenic requirements"

Joshua Chapman, Marketing Director for SLS commented "The synergy between LABMODE and SLS will ensure we can offer everything anyone would need within a cryopreservation environment. From cryotubes and racking right through to design and build of cryogenic storage facilities, SLS offer a complete solution to our customers' cryogenic requirements". He added "We are also delighted to be the only approved supplier to the London University Purchasing Consortium (LUPC) for the Taylor Wharton Cryogenic range".

The Taylor Wharton range will be fully supported by both LABMODE and SLS' sales and service teams, providing customers with support for all their cryopreservation solutions.
