

Rotavapor® R-100

Economical evaporation

The R-100 is an entry level Rotavapor® to meet the essential needs in evaporation and BUCHI's high quality standards.

Economical
Designed to meet essential needs

Solid and proven
User-friendly design at well-known BUCHI quality

Expandable
Increase efficiency by expanding to a complete solution

R-100: Your most important benefits

Economical

- Effective Rotavapor for limited budgets
- Fundamental design fulfills essential needs of evaporation
- High longevity thanks to high quality material

Solid and proven

- Reliable operation due to robust design
- Quick and ergonomic operation with smooth manual lift mechanism
- Easy flask handling and vapor duct removal thanks to multifunctional Combi-Clip

Expandable

- Easy operation by integrating interface, vacuum pump and recirculating chiller
- Expandable with a wide range of accessories and various glass assemblies
- Flexibility to use the independent heating bath for further applications

Complete your portfolio

Vacuum Pump
V-100
Economical
vacuum source

Interface
I-100
Economical vacuum
regulation

Recirculating Chiller
F-100 / F-105
The easy way of cooling

Multivapor™
P-6 / P-12
Efficient evaporation
for multiple samples
